ai HERWAY

Something *Big* is Here

You have been on this waitlist. Some of you for weeks. Some of you for months. You have been asking me when we're opening, and the answer is... Now.

That’s right - The AI for Impact Hub is open.

Before I tell you what is inside, let me tell you why it exists. Because it is the same reason 400 of you signed up to a waitlist without seeing a sales page.

My email list generated $78,000 in sales in a single week. From a system I built with AI. The same AI tools you already have access to.

That $78,000 did not come from one good email or one lucky week. It came from 18 months of a system running underneath everything I published. AI wrote the drafts. AI maintained the consistency. AI handled the workflows. I made the strategic decisions. And the trust, the authority, and the revenue compounded week after week after week while I worked less than 25 hours a week, raised four kids, and built a business that is now tracking past $2 million a year with 3 humans and 30 AI agents.

The AI for Impact Hub is where I teach that system. The complete AI operating system that runs my content, my marketing, my client delivery, my team operations, my revenue engine. 30 AI agents, each with their own role card, skills files, memory, governance rules, and scheduled routines. The same methodology organisations pay me $50,000+ to implement.

WHAT IS INSIDE RIGHT NOW

The AI for Impact Hub already has substantial training and working tools you can start using the day you join:

Foundation training on every major LLM - Claude, Gemini, Copilot, ChatGPT. Real working knowledge of how each one operates so you choose the right tool for the right job.

Building custom AI assistants - skills files, custom GPTs, Copilot agents, Gemini Gems. How to build them, govern them, and make them useful.

Connecting AI to your actual tools - setting up scheduled tasks, linking your LLMs to your actual workflows so they work inside your business, not just in a chat window.

Automation and agent fundamentals - what is an automation, how to map one, what is an agent, what components you need. The thinking that goes underneath everything you build.

Pre-built skills files and custom GPTs for common business roles - ready to use immediately.

A GPT-to-Claude converter tool - so if you have already built custom GPTs, you can convert them into Claude skills files. Nothing you have built is wasted.

The Marketing OS Intake Tool - an interactive tool that creates your complete suite of marketing skills files in one session. Use them with Claude, as custom GPTs, in Codex, or Claude Code. This is the fastest way to go from zero to a working AI marketing system for your business.

The AI OS Assessment - an interactive diagnostic that maps exactly where you are with AI right now and generates your personalised 90-day implementation roadmap. This is the same framework I use with organisations that pay five figures for a strategy engagement. It takes 20 minutes and changes how you think about your next 12 months.

AI ethics training and policy templates - so everything you build is safe, defensible, and built to last.

The ROSE-T prompting framework, the 5 Levels of AI Integration, and the

The ROSE-T prompting framework, the 5 Levels of AI Integration, and the EquiAI ethical implementation model.

Community access and direct access to me from day one.

WHAT IS COMING THIS YEAR

This is a living membership. What you see today is the starting point.

Throughout 2026, the AI for Impact Hub is rolling out a full 5-layer curriculum: from deepening your foundations into advanced prompt engineering and assistant building, through to building automations, agents, full agent teams, and ultimately your complete AI Operating System. The same methodology behind a seven-figure business on a four-day week.

Live workshops. New tools. New modules. New automations. All pushed to members as they are built. The founders who join early and lay their foundation now will be the first to receive every upgrade.

And the first live workshop? It is called 3 Humans, 30 Agents, 7 Figures: How I Actually Run My Business on Part-Time Hours with AI.

I am pulling back the curtain on the entire agent system: how I run a seven-figure business with three humans and 30 AI agents on part-time hours. You will walk away with your own AI agent blueprint and your first working skills file. More details coming soon.

HERE IS WHY VIP EARLY BIRDS HAVE THE ADVANTAGE

The founders who join now get something no one else will: the head start.

Run the AI OS Assessment. Build your custom assistants. Set up your Marketing OS using the intake tool. Start the foundation training. By the time the advanced modules and live workshops roll out, you will already have the base layer built. You will already understand how LLMs work, how to build assistants, how to map automations. While everyone else is starting from scratch, you will be building on top of a foundation you laid weeks ago.

That is the real value of being early. Not just the price. The head start.

THE VIP EARLY BIRD (April 1-20 only)

Because you have been waiting - and because I want the people who trust me before they see the full pitch to be rewarded for that trust - I am offering something for the next 20 days that will not come back:

- **Standard membership at early bird pricing** - $1,299/year or $390/quarter
- **Pro membership at early bird pricing** - $1,999/year or $600/quarter

PLUS: If you join at Standard, you get 3 months of Pro-level access free. That means live workshops with me, quarterly strategic AI updates, priority support, and advanced implementation sessions - included at no extra cost. My consulting and strategic work starts at $10,000 a quarter. You are getting that level of access free for three months simply for being an early bird and trusting the process before we even launch.

This is the best deal the AI for Impact Hub will ever offer. It closes April 20. After that, the early bird pricing stays but the Pro bonus is gone. And after April 30, pricing goes to $1,799/$2,499.

I built this membership because I needed it to exist. Not for anyone else - for me. I needed a place where women founders could build the same AI infrastructure I use to run a seven-figure business, and I needed it to be taught by someone who actually understands how these systems work at a deep, evidence-based level. Not someone who watched a YouTube video and made a course.

That place is the AI for Impact Hub. The doors are open. You have been waiting long enough. And there is real work for you to start on today.

Dr. Nici

P.S. Live workshops, new modules, and new tools are rolling out throughout 2026. Every AI for Impact Hub member gets access to everything as it drops. If you join now, you are first in line for all of it.
